

REGISTERING YOUR OWN YOUTUBE API KEY

To register your own key, follow these steps:

1. **Create a Google Account:** If you do not already have a Google account, create one now as you'll be needing it. Next go to the [Google Developers Console](#)
2. Click on **“Select a project”** in the upper-left, then **“Create a project”**.

3. Enter a project name and click **“Create”**.

New Project

Project name [?]

My Video Player

Your project ID will be my-video-player-1061 [?] [Edit](#)

[Show advanced options...](#)

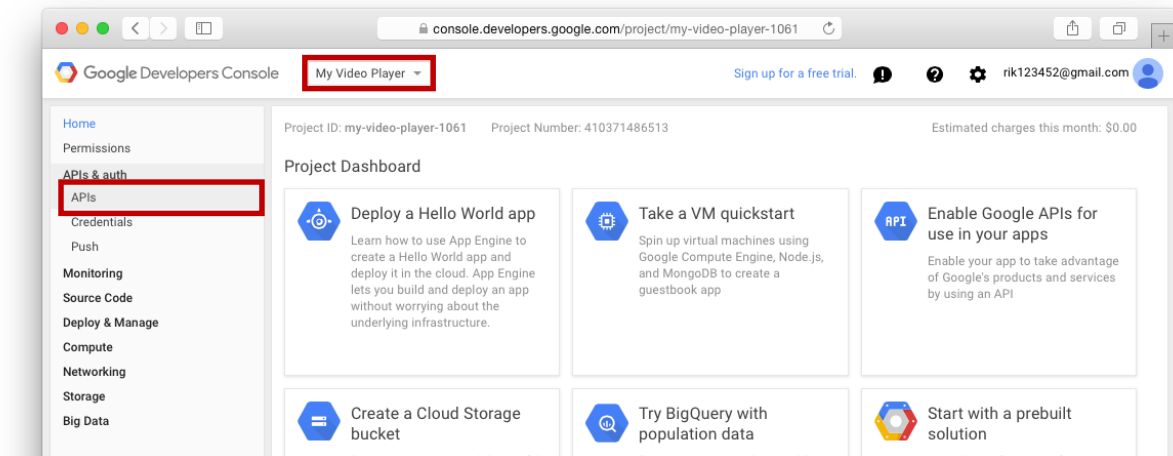

Please email me updates regarding feature announcements, performance suggestions, feedback surveys and special offers.

☐ Yes ☒ No

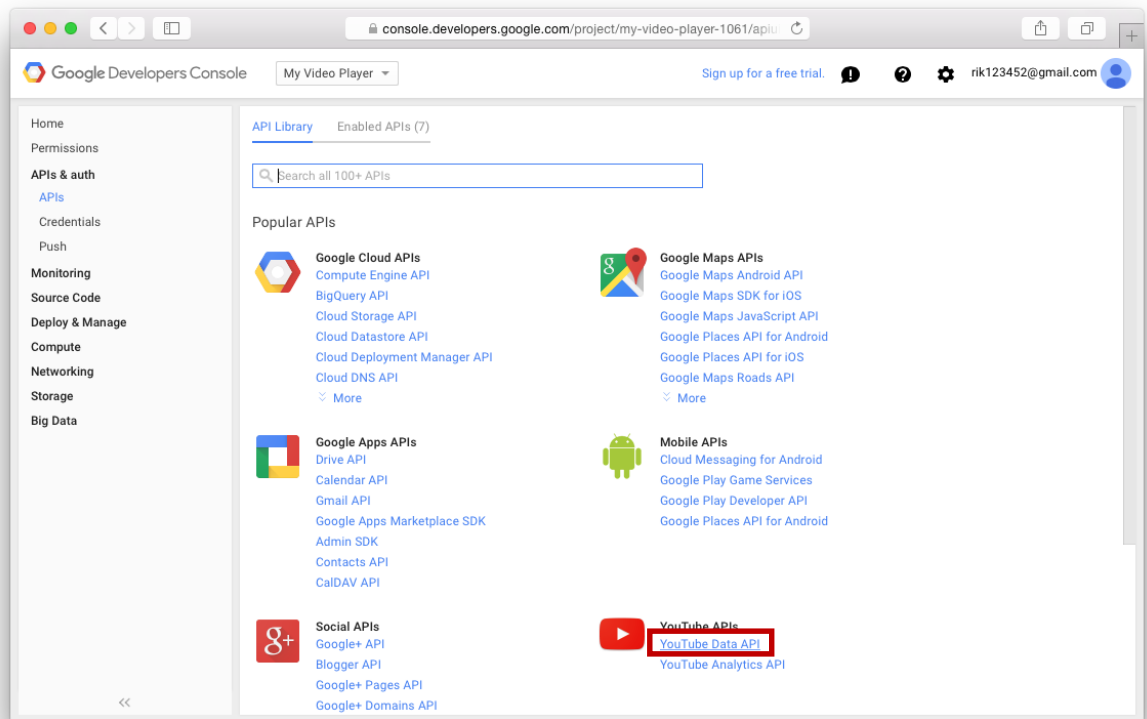

☒ I agree that my use of any [services and related APIs](#) is subject to my compliance with the applicable [Terms of Service](#).

[Create](#) [Cancel](#)

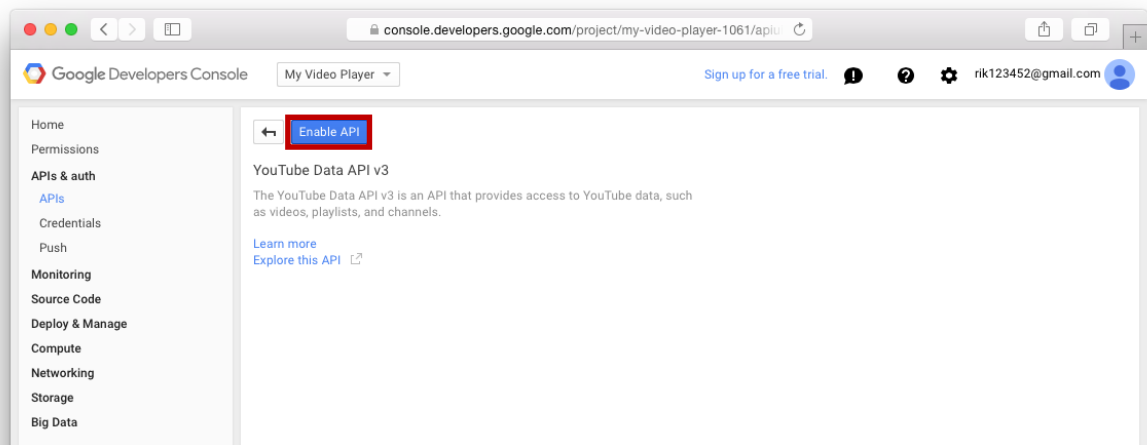

4. Next, open the project you created. Then go to **“APIs & auth”** on the left and click **“APIs”**.

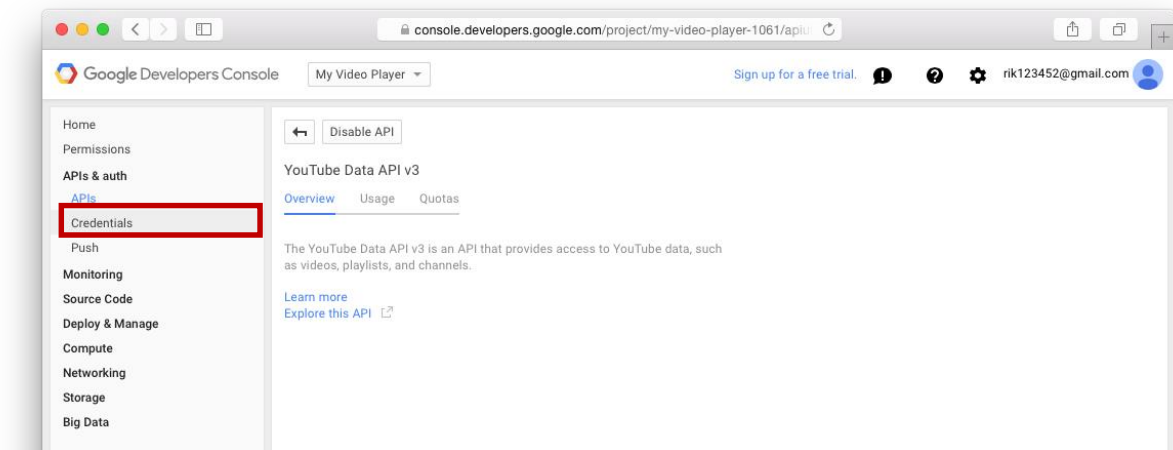

5. Click on **“Youtube Data API”** at the bottom of the screen.

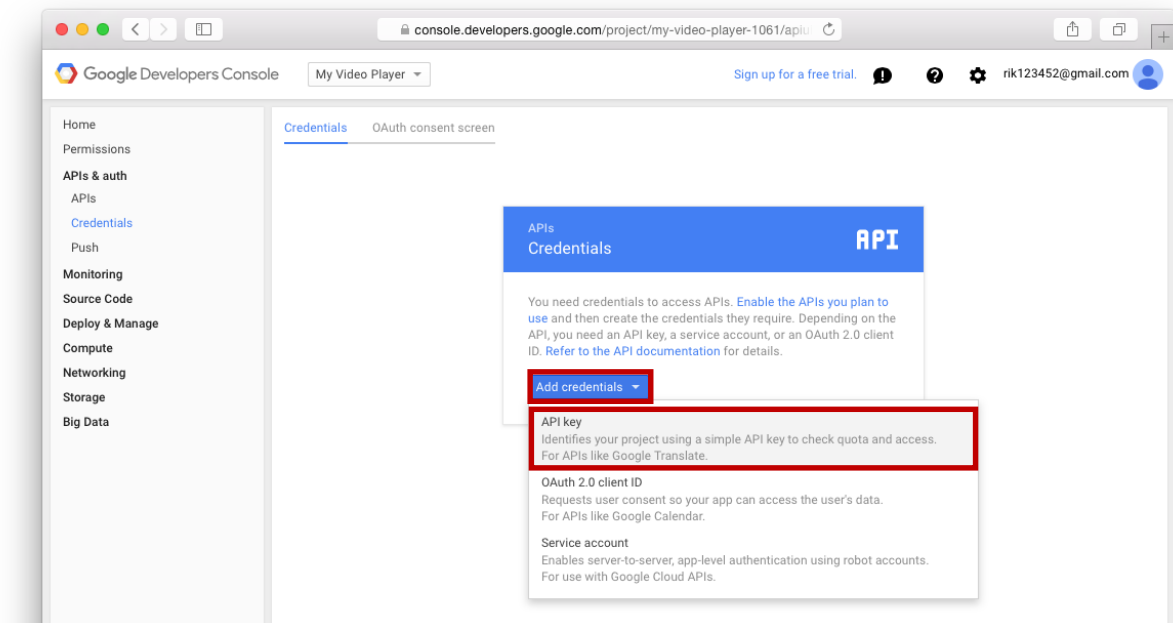

6. Click on **“Enable API”**.

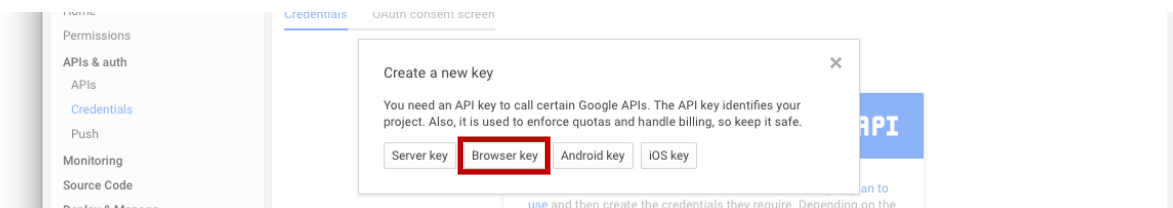

7. The API is now enabled. Next thing you have to do is create a browser key for this project. Click on **“Credentials”**.

8. The click on **“Add credentials”** and choose **“API key”**.

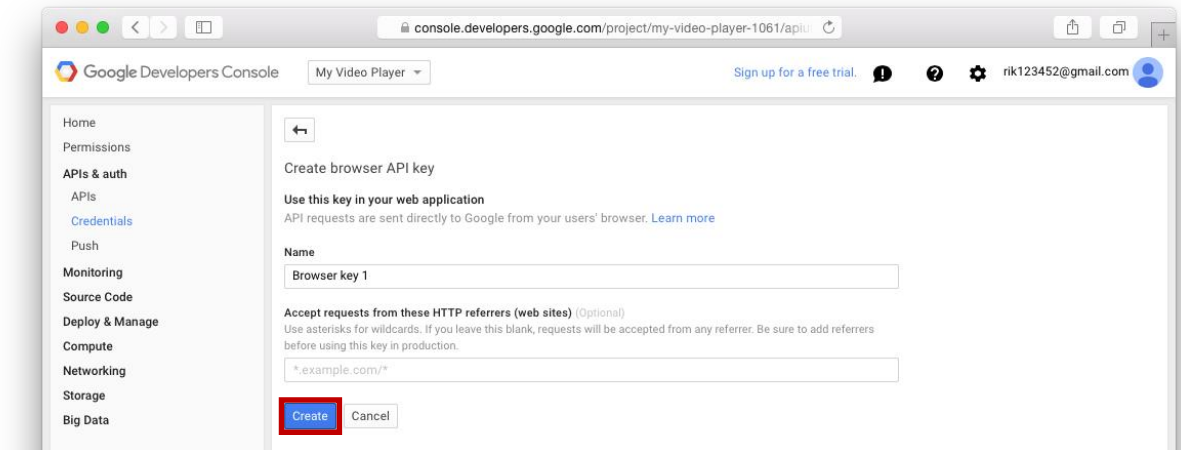

9. Select **“Browser key”**.

10. Enter a name for the browser key, then click **“Create”**.

Additionally you can type your website in the second textbox so the key only works for your site, but this is optional and only recommended if you have a heavy amount of traffic.

11. Copy paste the API key into the settings of the plugin and save changes. The plugin will now use your API key.
